

# Procurement360

Agile • Intuitive • Empowering

## Highlights

- Features modular design
- Promotes information sharing and collaboration
- Supports FAR/DFARS/AMS and contract compliance
- Delivers operational insights and efficiencies through dashboards
- Automates information collection and cataloging
- Provides electronic folders for storage of related artifacts
- Designed for easy configuration to meet changing requirements
- Tracks all communications
- Facilitates data entry tasks
- Leverages Microsoft Dynamics® XRM platform
- Provides familiar, intuitive Microsoft® user interfaces
- Provides seamless Integrations

## Achieving acquisition excellence

Federal acquisition organizations are challenged everyday with collecting and interpreting procurement artifacts from multiple applications and systems while also monitoring and managing procurement activities, performance and workflows. Today the Federal Government's legacy acquisition systems automate selected procurement process activities, primarily in the areas of solicitation development, evaluations and awards, and contract administration. What is needed in today's 21st century acquisition environment is a comprehensive, integrated information ecosystem designed to facilitate and provide increased visibility into every phase of the acquisition lifecycle -- starting with planning and forecasting, and ending with contract closeouts.

**Procurement360** represents the next generation of information gathering and knowledge management solutions. Procurement360 is built upon the integrated Microsoft® Dynamics XRM / SharePoint and Outlook platform -- and designed specifically by a team of government acquisition experts -- to meet the needs of government acquisition organizations.

**Procurement360** provides:

- Familiar Microsoft® Desktop Displays
- Acquisition Data Automatically Packaged into Easily Accessed Files
- Information Automatically Pulled In From Multiple Databases
- An Information Ecosystem that Fosters Collaboration
- Easily Configured Modular Acquisition Lifecycle Components

**Procurement360** offers modular design to meet the needs of all acquisition phases and stakeholders across the organization

# The Modules

## Plan360

- Requirements management
- Customizable, PALT calculation and task assignment scheduling
- Tracks funding and multiple funding sources
- Collaborative and interactive forecast dashboard

## Procure360

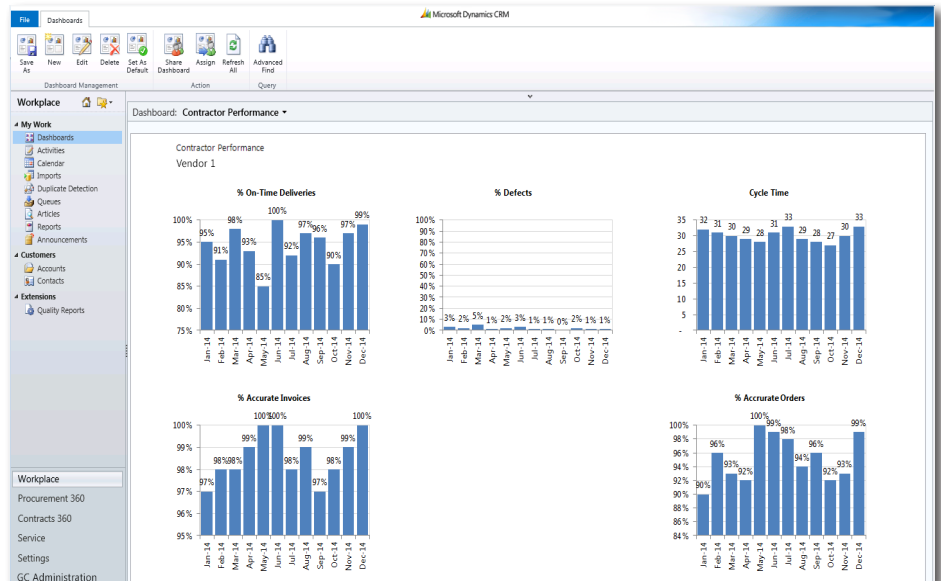

- Market research support
- Automated FAR/DFARS/AMS clause and provision
- Bid Team: Prime and sub-contractor tracking
- Workflow & dialogue enablement

## Manage360

- Vehicle, contract, and delivery order management
- Modifications management
- Deliverables and contractor performance
- CLIN/SLIN and ACRN tracking
- Estimate to actual budget reporting
- GFI, GFM, & GFE management
- Custom dashboard

## Closeout360

- Complete contract history automatically assembled in a single file
- Excess funds and financial review analysis
- Cost adjustment support
- Property disposition support
- Contract completion tasking

**Agile.** Procurement360 provides acquisition organizations with a highly agile system that is easily re-configured to meet the evolving and unique needs of the user community, while also reducing the need for costly software upgrades. Built upon the Microsoft Dynamics® XRM platform, Procurement360 provides a single master source of all contract information, giving enhanced Outlook®-based access and visibility into all relevant procurement data for users across the organization.

**Transparent.** Procurement360 enhances visibility by automating the collection and delivery of procurement specific information such as Excel spreadsheets, RFIs (market assessments), previous RFPs, PowerPoint® presentations, Outlook® artifacts and other documents that relate to specific acquisition objectives. Everything associated with a particular procurement, including all relevant emails, calendar invites and stakeholder actions and approvals, can be tagged, searched and pulled together instantaneously into an electronic folder that presents users with all the specific information required.

**Productive.** To increase efficiencies and optimize productivity, Procurement360 streamlines the acquisition process by making arduous entry and cataloging tasks much easier to complete and more accurate. In addition, Procurement 360 provides management with the real-time dashboard reporting and data analysis needed to quickly identify and resolve workflow bottlenecks

**Familiar.** Procurement360 is designed to track all acquisition lifecycle communications and interactions -- and facilitate activities through automated workflow messaging. Communications and tracked activities are visible in Outlook®, Internet Explorer®, and SharePoint®, which present users with these familiar desktop environments.
